Interpretation:

RN: 76496

Combined Relatedness Index: **41,178,740**

The DNA from the alleged relative was compared to the tested child. Based on testing results obtained from the analyses of the DNA loci listed, the probability of relatedness is 99.999997%. The likelihood that the alleged relative is the biological relative of the tested child is 41,178,740 to 1. This probability of relatedness was calculated by comparing to untested, unrelated, random individuals of the Hispanic population (assumes prior probability equals 0.50).

Subscribed and sworn before me on January 1, 2025

I, the undersigned Laboratory Director, verify that the interpretation of the results is correct as reported on 1/1/2025.
