Interpretation:				RN: 76496	
Combined Relatedness Index:		246,088			
The DNA from the alleged mother was compared to the tested child. Based on testing results obtained from the analyses of the DNA loci listed, the probability of relatedness is 99.9995%. The likelihood that the alleged relatives are the biological relatives of the tested child is 246,088 to 1. This probability of relatedness was calculated by comparing to untested, unrelated, random individuals of the Caucasian population (assumes prior probability equals 0.50).					

Subscribed and sworn before me on January 8, 2025

I, the undersigned Laboratory Director, verify that the interpretation of the results is correct as reported on 1/8/2025.
