Interpretation:

Combined Index: **0**

**0%**

Probability of Monozygosity: **0%**

RN: 76496

The tested individuals are excluded as identical twins. The genetic markers observed are not identical. Based on testing results obtained from the DNA loci listed, the probability of twin monozygosity is 0%.

Note: Since the samples were not collected under a strict chain of custody by a third neutral party and the Laboratory cannot verify the origin of the samples, this test result may not be defensible in a court of law for the establishment of paternity and other legally related issues. The tested parties' names that may appear on this report have been provided by the client and cannot be verified. The laboratory assumes no responsibility for incorrect or misspelled patient information.

Based on the samples received from the tested parties whose identities cannot be independently verified, I, the undersigned Laboratory Director, declare the genetic data is correct as reported on 1/8/2025.
